

Project Milestone 2

XiaomengWang, Huanxin Hu, Shuang Wu

1. Our current progress:

We have already ported all of our codes to ember.js. And finished 97% of our features. Our backend is using node.js and mongodb. All the data are stored locally. Please see the attached screen shot:

2. Next step:
Fix some small bugs and make demos.

Note: If you cannot open the app correctly, we could show you how it works using our laptop.
